

ACE WIRE SPRING & FORM MEDIA CENTER

Celebrating 80 Years in Business - Ace Wire Spring & Form Co., Inc.
A2Z Manufacturing - May/June 2019

Ace Wire Spring & Form Co., Inc. is celebrating its 80th anniversary in business! An industry leader in the manufacturing of Compression Springs, Extension Springs, Torsion Springs, and Wire Forms, Ace Wire Spring has been family owned and operated since it began in an attic of the owner's house located in McKees Rocks, PA.

In 1939, Ace Wire Spring & Form started out in the industry with a small coiling machine making garter springs by hand. The owner, Joseph Vodvarka, was a machinist, working hands-on in the upstairs room of his house, which was converted into a small office / shop to produce the garter springs needed at the time. Through the years, Ace Wire Spring & Form grew, and the belief of family was always a part of it. In 1976, Joseph Vodvarka's daughter, Linda, and her husband Rich Froehlich, bought the company and continue to keep Ace Wire Spring & Form a family owned and operated business. Rich and Linda Froehlich have a strong belief in family, and carry over that belief into the Ace Wire Spring & Form culture when doing business. Customers benefit from this by receiving personalized customer service, engineering assistance, and a quality final product suited to meet their needs. In turn, Ace Wire Spring & Form is the one who thanks the customers for making it possible for Ace Wire Spring & Form to be celebrating being in business for 80 years. The company's 80 years of experience is expanding into new machinery and the most up to date technology, allowing them to offer the widest variety of custom precision springs. Ace Wire Spring also continues to be a community leader, growing awareness of manufacturing career opportunities and reaching out to help grow the next generation of manufacturing.

About Ace Wire Spring and Form Company, Inc.

The 80 years of experience that Ace Wire Spring & Form has allows them to offer a wide variety of custom precision springs. They have a first-class team of on-site engineers to assist customers with developing solutions for a large variety of applications, along with their on-site quality control staff. Their veteran craftsmen working in the shop are trained in the latest and most advanced forms of mechanical and CNC wire forming machines and techniques, and have a combined 100 years of experience and success within the industry. The benefit Ace Wire Spring & Form delivers to companies time and time again is that it understands their customer's needs and meets their requirements while delivering a quality product.
