

## **ACE WIRE SPRING & FORM CELEBRATING MFG DAY**

*by John Higgins, Ace Wire Spring & Form*

Every year in October the Manufacturing Industry celebrates MFG Day, an annual series of events in which creators, doers and makers open their doors to showcase an exciting day in the life of modern manufacturing in the U.S.

Ace Wire Spring & Form has been proud to take part in this event over the years, celebrating the entire month of October by hosting groups of high school and college students on tours of our facility. This allows us to show spring making up close and meet with the students describing the different career paths and opportunities there are available.

Another way we reach out to students is to create brief, informational videos about the career potentials in manufacturing, and a way to easily contact us for more information.

On our Ace Wire Spring YouTube channel we have:

### **Benefits of a Career in the Manufacturing Industry:**

<https://www.youtube.com/watch?v=GrahtJhGhpU>

### **The Future of Manufacturing:**

<https://www.youtube.com/watch?v=-aqfQI368I0>

Ace Wire Spring & Form also has a page on our website with links and information on MFG DAY and the program of “Creators Wanted” (<https://www.acewirespring.com/mfgday.html>) containing links to articles, materials, and online events to showcase the endless possibilities in the manufacturing industry.
